

# Permissions needed by TFS4JIRA Synchronizer - Cloud Native

## Jira issues and Azure DevOps work item synchronization

TFS4JIRA Synchronizer connects to Jira using the credentials provided in the synchronization profile. For the work items / issues synchronization to work, the user must have the following permissions:

### Jira permissions

Permission	Required	Notes
Add Comments		Only if <b>Comments</b> synchronization is enabled
Assign Issues		Only if the <b>Assignee</b> field is mapped
Browse Projects		
Close Issues		
Create Attachments		Only if <b>Attachment</b> synchronization is enabled
Create Issues		
Delete Issues		In exceptional cases due to race conditions we may create orphan items that have to be cleaned up
Edit Issues		
Modify Reporter		Only if the <b>Reporter</b> field is mapped
Resolve Issues		
Transition Issues		

### Azure DevOps permissions

#### Organization

Access Level	Required	Notes
Basic		Only if <b>Tags</b> field is mapped

#### Project

User Group	Required	Notes
Contributors		Minimum set of permissions
