Spartez Software has joined the Appfire family. [Learn more!](#)

Looking for a way to improve your estimations and plan more accurately? Meet [Agile Poker for Jira - estimation&planning](#) - the estimation toolkit created for Agile teams by experienced Scrum Masters.

Key highlights:

- Fully featured [Planning Poker®](#) directly in your Jira Software backlog view.
- [Asynchronous sessions](#) simplifying preparation to backlog refinement meetings.
- [Relative session](#) supporting [Magic Estimation](#) method.
- Built-in [Triangulation](#) feature for referencing.
- Customisable estimation values (you can use Fibonacci sequence, T-shirt sizes or any other custom deck).
- Built-in timers allowing to time-box your estimation sessions.
- Reliability confirmed on over 2000 Jira instances of all sizes.
- World-class support.
