

Cards preview and print

This is the most important tab in the Agile Cards user interface.

It is here that you can see the preview of your printout and send it straight to your printer.

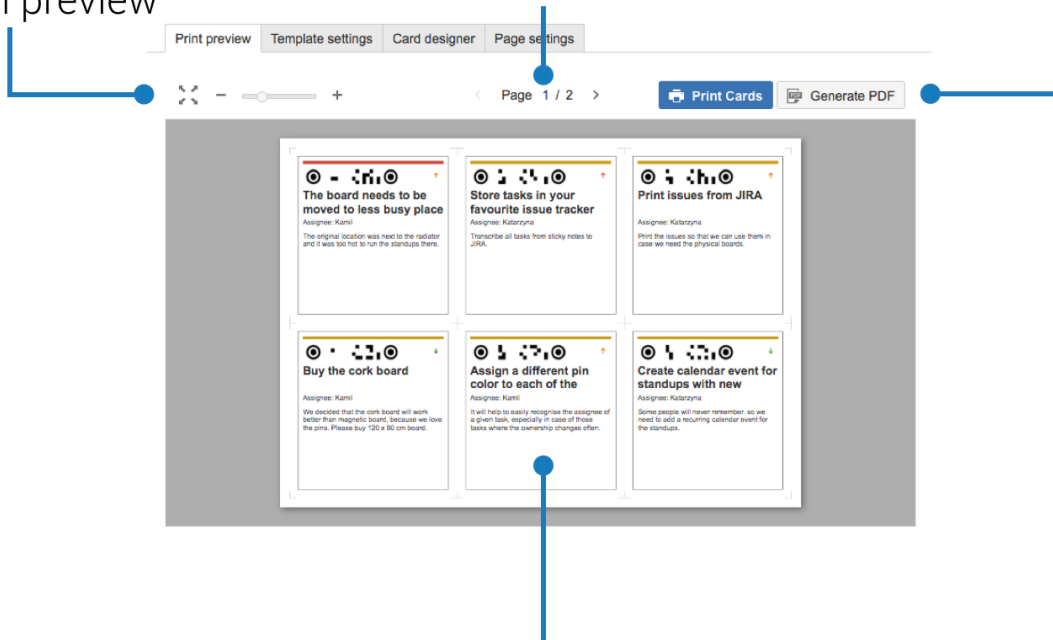

This tab of Agile Cards' interface is accessible by all users who have access to given board, issue, or search results.

Zoom in or out to see the full preview

See other pages

Press to print or generate PDF

Page and layout preview

Zoom

The zoom slider allows you to select the magnification of your preview. Zoom in to see the details of the cards better. Zoom out to see the whole page or 'bigger picture'. Press the **'Fit on page'** button to optimise the preview zoom factor.

Page flipper

By default, only the first page is displayed for the preview. If you want to see the other pages, or see the flip sides of the cards, click the '<' or '>' buttons.

Print cards

By pressing the **'Print Cards'** button you invoke the system printer dialog and send the preview to your printer.

Generate PDF

Instead of printing the cards directly you can create a PDF document. Read about PDF generation here: [Generation of PDF files](#).
